

WRITER'S REWARD COIN

WHITE PAPER

Introduction

Writer's reward coin is a bep-20 token standard that allow writers and content creators such as bloggers, freelance paper writers, youtubers etc, to earn the token by submitting their blog / url, freelance profile, or youtube channel. The amount of token one earns depends on how performant and impactful their blog, profile or channel is. Our goal is to incentivize every content creator to pursue their desire and goal of becoming a better writer as well as a better person.

We design the plartform in a way that puts the top ten holders of WRC on top of the management board for decision making in order to maintain the token's reputation. Meaning whichever writer or content creator has the most tokens, will be the lead of the management board (only if he wants) followed by the next biggest holders.
